

# AGRI LAUNCH BASE

Empowering International Agri-Tech Startups in India

## OVERVIEW:

Agri Launch Base offers a 50-acre ERP-enabled farm in Karnataka, providing a prime location for international agri-tech startups to test their products and technologies in the Indian market. The farm has dedicated spaces for hydroponics, forest species, and major crops like areca nuts and mango, providing startups with the ideal environment to run pilot projects for their equipment and technologies. This allows companies to refine and adapt their solutions for the diverse needs of Indian agriculture.

## KEY FEATURES AND SERVICES:

- ERP-enabled Farm Space
- Pilot Programs
- Sensor Installation
- Data Generation and Analysis
- Customized Reports
- Feasibility Reports
- Engagement with Local Farmers
- Accommodation and On-site Support

## FACILITIES:

We provide a fully equipped environment for productive work, including:

- 24/7 water supply and electricity
- High-speed internet access
- Clean and comfortable accommodations
- Reliable infrastructure for power and connectivity

## LOCATION:

Western Ghats, Karnataka

## APPLICATION PROCESS:

To be considered for the Agri Launch Base program, please send an email to [insert email address] with the following details:

A brief overview of your business and its objectives.

- Explanation of why your startup would be a good fit for our program.
- Your technology readiness level, including any existing revenue.
- Responses to standard application questions (provided upon inquiry).

## IDEAL FIT FOR COMPANIES SPECIALIZING IN:

- Cultivation Management Solutions
- Drone Technologies for Agriculture
- Satellite-Based Data Analytics
- Water Conservation Technologies
- AI-driven Agricultural Productivity Enhancements
- Forest Management and Tree Mapping

## CROP TYPES:

- Areca
- Banana
- Mango
- Guava

- Black Pepper
- Rice
- Teak Wood/Mahogany
- Forest Trees

## BENEFITS:

- Six-week pilot program offering a fully connected, plug-and-play work environment
- ERP-enabled farms equipped with an extensive sensor network
